

Wax Coil™

Cross Coil™ has been a great succes during past 8 years.
With a little help from our audio friends we have developed our new
Wax Coil™

This product is a nostalgic treasure.

The insulation used for Wax Coil™ is 60 µm special quality paper wounded with the same pure 99,9998% copper foil we use for Cross Coil™.

Each coil is impregnated with a polymolecular paraffin wax.
Through this process our coil become hard as a rock.

Each coil is tested with Clio system.

Wax Coil™ is available in the following size:

16 AWG - 1,33 mm² - coil height 24 mm
14 AWG - 2,10 mm² - coil height 36 mm
12 AWG - 3,29 mm² - coil height 54 mm

From January 2007 available from our dealers world wide.
